

BT
a document viewer for displaying a document or modifying a document within a component based application program, the document viewer having a user interface requirements specification referencing at least one of said plurality of user interface components; and

a renderer to render a graphical user interface for the application program according to said document viewer's user interface requirements specification, when said document viewer is added as a component of the application program, without the need to recompile or reinstall the application program.

Sub C3
21. (Amended) A method for providing a graphical user interface for a component based application program, comprising:

providing a user interface requirements specification for a document viewer, the document viewer being used to display a document or to modify a document within a component based application program, and the user interface requirements specification referencing at least one of a plurality of user interface components; and

rendering a graphical user interface for the application program according to the document viewer's user interface requirements specification, when the document viewer is added as a component of the application program, without recompiling or reinstalling the application program.
